DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mehnert (U.S. Patent # 4,685,043) in combination with Marwali (U.S. Patent # 6,466,465) and Perry (U.S. Patent # 6,768,658).

Mehnert discloses claimed subject matters a power conversion apparatus (figure 2 and 3), including AC power phase by an amount substantially equal 360 degrees (figure 3), divide by number of converters per phase. Mehnert does not disclose the utilization of the technique for the purpose of reducing the high frequency ripple current at the common connection point, pulse filter inductors and servo loop regulation. Marwali teaches the utilization of the similar technique for the purpose of reducing the high frequency ripple current at the common connection point, pulse filter inductors (figure 2) and Perry teaches the utilization of the technique for servo loop regulation and power conversion topology like buck or boost or other derived topology (column 1, line 45-55 and column 2, line 60-68). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Mehnert's multiphase system by

utilizing the technique taught by Marwali and Perry for the purpose of providing an inverter in which phase displacement between current and voltage without damaging effects for direct voltage source (column 5, line 15-25).
